AUG 16 1999

Dear Ms. Dixon:

- 1 [As a Nevada resident I am totally opposed to a temporary or permanent nuclear waste facility being placed in my state; it should not be jammed down our throats. Nevada didn't create the problem.]
- 2 [The waste should stay where it is at and a method to neutralize it (or whatever) should be developed - sparing no cost. I am no scientist but I am sure that those who are can come up with a solution.]
- 3 [The protection of human life and the environment should be the primary consideration not money or a quick solution to a problem created years ago.]

Sincerely,

M. Autry
